SCORM Cloud validation

Mining, Quarrying, and Oil and Gas Extraction Safety Orientation

MSO-001 / Edition 1.0.0 / SCORM 1.2 / Surface mine or quarry path

PASS

One sandbox registration. Three launches. Two quiz submissions.

What the LMS recorded

AT EXIT	COMPLETION	SUCCESS	SCORE
Bookmarked after lesson 1	Incomplete	Unknown	Unscored
12 of 13 / missed the MSHA item	Incomplete	Unknown	92%
11 of 13 / answered MSHA item correctly	**Complete**	**Passed**	**85%**

Learner checks

Leave and return

SCORM Cloud reopened lesson 2 with the quarry setting and the first check saved. A later launch retained the 92% score and the required review of the mine-entry lesson.

Activities and retake

All seven field practices and lesson checks completed. The four Stop and Ask situations worked by keyboard. After reviewing the missed topic, the minimum passing score produced a general orientation record showing two quiz attempts.

Supervisor worksheet

The LMS download matched the released three-page PDF and contained all 18 form fields. The employer records the walkthrough separately from the online result.
